

December 29, 2020

Dear Family Member,

Due to the prevalence of COVID-19 in our facility, we are continuing to test all residents and staff regularly. Unfortunately, we have a few more staff members who have tested positive. We are awaiting results on our residents. Some of our previously reported staff have returned following a 14-day quarantine and a negative result. We currently have 7 positive residents and 20 recovered positive residents in-house.

Our vaccination program with Walgreen's Pharmacy is scheduled for January 7, 2020. We will vaccinate all residents and staff who have consented. We have had approximately 40 staff members already receive their vaccines through other means.

We will continue to follow the Department of Health and CDC guidelines to protect our residents and co-workers. As this week's test results are received, I will be sure to communicate any further positive cases to you at that time. Thank you in advance for your prayers and understanding.

Sincerely,

*Fortunato Scerbo III*
