

January 3, 2022

Dear Family Member,

As a follow-up to yesterday's COVID update, I wanted to let you know that all residents and staff are being tested. We have identified a total of eight residents and a couple staff members who are COVID positive. The positive staff members have been furloughed as per CDC guidelines. We will continue to conduct regular testing of all our residents and staff until a duration of 14 days with no new positives is achieved.

We are currently treating our COVID positive residents with a monoclonal antibody treatment called Sotrovimab. At this time, it is the only authorized monoclonal antibody product expected to be effective against the omicron variant. All of our residents are doing well at this time. I am hopeful that this treatment will aide our residents to a speedy recovery.

As always, I will continue to update you on our COVID situation. I appreciate your prayers and support.

Sincerely,

Fortunato Scerbo III

Administrator
